Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
 - If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
 - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
 - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claim 8 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Regarding claim 8, missing element in line 7, for instance, “the ~~first~~ and second inductors...”.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1-6, 9-17 are rejected under 35 U.S.C. 102(b) as being anticipated by Bingel (5,848,150).

Consider claims 1, 6, 13. Bingel teaches a frequency sensitive electrical circuit (fig. 6), comprising first and second inputs (21a-b); at least one transformer circuit (L2 and L4) having a first winding connected to the first input and a second winding connected to the second input; a first load (C3, R3) connected in parallel to the first winding (L2); a second load (C4, R4) connected in parallel to the second winding (L4); first and second outputs (23a-b) connected to

the first and second windings; and a (first) capacitor (C5) connected between the first and second outputs.

Consider claims 2, 9, 14. Bingel further teaches a signal carrying both voice (POTS) and data (DSL) information is received at the first and second inputs (see the entire abstract).

Consider claims 3, 10, 15. Bingel further teaches the circuit filters a lower frequency portion of a signal received at the first and second inputs (col. 1, ln. 55 to col. 2, ln. 3).

Consider claims 4, 11, 16. Bingel further teaches the circuit reduces the distortion of a signal received at the first and second inputs and delivered at the first and second outputs (col. 1, ln. 55 to col. 2, ln. 3; col. 2, ln. 53-56).

Consider claims 5, 12, 17. C3 provides third output and C4 provides the fourth output. C3 connected to the input of stage 1 (21a). C4 connected to the input of stage 1 (21b).

Allowable Subject Matter

5. Claim 7 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

6. Claim 8 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

Conclusion

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Duc Nguyen whose telephone number is 703-308-7527. The examiner can normally be reached on 7:00AM-3:30PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Curtis Kuntz can be reached on 703-305-4708. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
